

Manish Patiyal

Senior Mobile Engineer – React Native | AI/LLM Integration

Mobile Specialist | React Native Architect | AI-Driven Application Development
manishpatiyal27@gmail.com | +91-82630-81437 |

PROFESSIONAL SUMMARY

Senior Mobile Engineer with 12+ years of production expertise in React Native and cross-platform mobile architecture. Proven track record delivering 5M+ download applications with enterprise-grade performance. Currently focused on designing and integrating AI/GenAI capabilities into mobile applications. Strong foundation in GraphQL, API design, mobile performance optimization, WebRTC and team leadership. Actively learning Python, LLM integrations, and AI-powered mobile features to build next-generation intelligent applications.

CORE COMPETENCIES

Mobile Development: React Native (12+ years) | Turbo Modules | Native Bridge | iOS/Android Integration | TypeScript/JavaScript | Kotlin/Java

Architecture & Performance: Redux State Management | Modular Architecture | Mobile Performance Optimization | Production App Architecture | Scalable Design Patterns

Backend Integration: GraphQL (Apollo Client) | REST APIs | Query Optimization | Caching Strategies | Offline-First Data Management | Real-time Synchronization

AI/ML Integration: Learning Python | GenAI/LLM APIs | AI Integration Patterns | RAG Architecture (Learning) | Mobile AI Use Cases

DevOps & Quality: CI/CD Pipelines (Bitrise, Jenkins) | Git/GitHub | Jest Unit Tests | Integration Testing | App Store/Google Play Deployment | TDD | Code Quality | Crash Analysis

Leadership: Technical Architecture | Team Mentoring | Solution Design | Agile/Scrum | Client-Facing Technical Discussions

PROFESSIONAL EXPERIENCE

VT Netzwelt Pvt. Ltd., Chandigarh

Senior Principal Technical Lead | Jan 2022 – Present

- Led cross-functional mobile team delivering production-grade React Native apps for enterprise clients in Real Estate, Retail, and Consumer Research
- Architected scalable mobile solutions: GraphQL integration, Redux state management, optimized data caching, offline-first patterns
- Delivered 40%+ performance improvements across iOS/Android: startup optimization, memory optimization, rendering efficiency
- Mentored engineering team on React Native best practices, TypeScript, API integration patterns, and architectural principles
- Optimized CI/CD pipelines: 50% reduction in deployment time, automated bi-weekly releases
- Integrated enterprise SDKs (Insta360): custom native bridge modules, complex lifecycle management, cross-platform SDK integration
- Collaborated with cross-functional teams: Product, Backend, Design, and emerging AI/ML initiatives on intelligent feature integration

VT Netzwelt Pvt. Ltd., Chandigarh

Senior Software Engineer | May 2017 – Jan 2022

- Built and shipped GfK Consumer Scan (5M+ Google Play downloads): React Native with production-grade architecture
- Designed scalable client architecture: Redux normalized state, 50+ component library, responsive design patterns
- Implemented GraphQL integration: Apollo Client, optimized queries, mutation handling, intelligent pagination, real-time sync
- Developed core features: barcode scanning, offline data sync, image processing, REST/GraphQL APIs, native SDK integration
- Achieved 35% startup time reduction through optimization: render cycles, memory efficiency, low-end device performance

- Established testing framework: 300+ Jest unit tests, integration tests, automated CI/CD pipelines, consistent code quality
- Mentored junior/mid-level developers: code reviews, architecture guidance, technical decision-making

IDEMIA, Noida

Software Engineer | Aug 2013 – May 2017

- Developed Android biometric solutions: proprietary SDKs, Healthcare/Telecom/Security sectors
 - Built reusable Android components and SDK integration frameworks for identity verification workflows
 - Designed Remote SIM Personalization application: secure provisioning, profile management
 - Delivered production solutions: architecture design, customer support, enterprise deployment across global teams
-

KEY TECHNICAL ACHIEVEMENTS

GfK Consumer Scan – Enterprise Platform (5M+ Downloads)

- Production React Native app (iOS & Android) serving millions of active users
- Redux-based state management with normalized data structures for complex business logic
- GraphQL integration: optimized queries, mutations, pagination, offline-first caching, optimistic updates
- Component library: 50+ reusable components with responsive design patterns
- Quality metrics: 99.5% crash-free rate, comprehensive monitoring, Jest testing framework

Keyhook – 360° Real Estate Visualization Platform

- Custom React Native native bridge for complex SDK integration (Android & iOS)
- Cross-platform architecture managing native APIs and lifecycle management
- GraphQL-backed APIs for property data, metadata, and user interactions
- Full technical ownership: architecture through production deployment and maintenance

Sarah — AI Health Assistant (Azure OpenAI, LiveKit/WebRTC)

24/7 conversational health AI app: live video conversation with an AI avatar, answers from Azure OpenAI, Built the real-time avatar loop — speech-to-text → Azure OpenAI Assistants API → spoken reply via LiveKit data channel, Added Google Places-based nearby-doctor discovery and paginated Azure thread history

EDUCATION

B-Tech in Computer Science & Engineering | Lovely Professional University, Jalandhar | 2013 | CGPA: 8.75/10

Diploma in Computer Science | Government Polytechnic, Sundernagar | 2010

CURRENT LEARNING & AI FOCUS

• Active learning: Python for ML/AI applications and LLM integrations • Exploring AI patterns: GenAI APIs, LLM integration strategies, intelligent mobile feature design • Focus: Bridging mobile architecture expertise with AI/LLM capabilities • Interest: Building AI-powered mobile experiences using modern LLM technologies

KEY CERTIFICATIONS & TECHNOLOGIES

Languages: TypeScript | JavaScript | Kotlin | Java | Python (Learning)

Frameworks & Libraries: React Native | Redux | Apollo Client | GraphQL | Android Jetpack

Cloud & DevOps: Bitrise | Jenkins | Git | CI/CD Automation | App Store/Google Play Deployment

Testing & Quality: Jest | Integration Testing | TDD | Code Analysis | Crash Analytics

Platforms: iOS | Android | macOS
