

Manish Patiyal

Senior Principal Technical Lead with 12+ years of experience in designing and delivering scalable Android and React Native applications. Experienced in solution architecture, native SDK integration, technical leadership, pre-sales consulting, client engagement, and leading cross-functional teams for global clients.

EXPERIENCE

VT Netzwelt Pvt. Ltd., Chandigarh

Senior Principal Technical Lead | Jan 2022 – Present

- Lead a cross-functional mobile development team delivering React Native and Android applications for global clients across Real Estate, Retail, and Consumer Research domains.
- Drive technical solution design, architecture reviews, code reviews, root cause analysis (RCA), corrective and preventive actions (CAPA), and sprint retrospectives to improve engineering quality and delivery.
- Translate business requirements into scalable technical designs, estimate effort, break down epics into actionable development tasks, and mentor developers throughout the implementation lifecycle.
- Actively participate in **pre-sales activities**, including technical discovery sessions, solution design, architecture discussions, effort estimation, proposal preparation, and client presentations.
- Serve as the primary technical point of contact during client meetings, collaborating with stakeholders across Europe, North America, and other international markets to define product roadmaps and resolve technical challenges.
- Continued hands-on development to stay technically current, contributing to React Native, Android, and native SDK integrations.
- Led the integration of the **Insta360 Native SDK** into the **Keyhook** React Native application by developing custom native bridge modules for Android and iOS, enabling immersive 3D property visualization for real estate applications.

Senior Software Engineer | May 2017 – Jan 2022

- Designed, developed, and maintained cross-platform mobile applications using React Native and native Android technologies for international clients.
- Built the **GfK Consumer Scan** application from the ground up using React

SKILLS

Languages: Kotlin, Java, JavaScript, TypeScript

Mobile: Android, React Native, Cross-Platform Mobile Development

Android: Jetpack, KTX, LiveData, ViewModel, Hilt, Room, WorkManager, XML

React Native: Turbo Modules, Native Bridge Development, Third-Party SDK Integration, REST APIs

Databases: Room (SQLite)

Cloud & Services: Firebase

Development Tools: Android Studio, Xcode, Cursor

CI/CD: Bitrise, Jenkins

Version Control: Git, GitHub, GitLab

Project Tracking: Mantis, Jira

LANGUAGES

English, Hindi

Native, delivering a production application that has surpassed **5M+ downloads** on Google Play.

- Developed scalable mobile features including barcode scanning, offline synchronization, camera integrations, REST API communication, and native module integrations.
- Collaborated closely with Product Managers, UI/UX designers, QA teams, and overseas clients to gather requirements, create technical specifications, and deliver high-quality software.
- Published and maintained multiple production applications on the Google Play Store and Apple App Store, ensuring performance, stability, and continuous feature delivery.
- Mentored junior developers through code reviews, technical guidance, and knowledge-sharing sessions, and regularly conducted internal technical seminars on Android and React Native development.

IDEMIA, Noida

Software Engineer | August 2013 – May 2017

Developed Android-based biometric solutions for clients in the Healthcare, Telecom, and Security domains using proprietary biometric SDKs.

Designed and implemented reusable Android applications and SDK integrations for biometric enrollment, authentication, and identity verification, enabling seamless integration with third-party applications.

Built an innovative Remote SIM Personalization application, allowing secure provisioning and profile loading of SIM cards on IDEMIA tablets without requiring traditional SIM programming infrastructure.

Collaborated with the technical team supporting Reliance Jio to integrate biometric authentication solutions for customer and agent enrollment, identity verification, and onboarding workflows.

Worked closely with Product Management, Technical Sales, and Customer Engineering teams to deliver pilot implementations, technical demonstrations, and proof-of-concepts for enterprise customers across India and international markets.

Participated throughout the product lifecycle, including solution design, SDK integration, customer support, troubleshooting, and deployment.

EDUCATION

Lovely Professional University, Jalandhar — B-Tech (CSE)

JUNE 2010 - AUGUST 2013

Graduated with 8.75 CGPA (78.75%).

Coursework included Artificial Intelligence, Automata Theory, Data Structures, Operating Systems, Computer Networks, and Database Management Systems.

Completed a capstone project involving the design and development of an Enterprise Resource Planning (ERP) system, applying software engineering principles and full-stack application development.

Government Polytechnic, Sundernagar — *Diploma(CS)*

JUNE 2007 - AUGUST 2010

Built a strong foundation in computer science, programming, networking, and software development through extensive practical training.

Completed an internship with the Department of Information Technology (DoIT), Himachal Pradesh, contributing to the HIMSWAN (Himachal State Wide Area Network) initiative and gaining hands-on exposure to enterprise networking and government IT infrastructure.

PROJECTS

YG Shopper App

Developed the GfK Consumer Scan mobile application from scratch using React Native for both Android and iOS.

Architected and implemented a scalable, cross-platform application with reusable components, navigation, state management, and REST API integrations.

Built core features including barcode scanning, receipt capture, image uploads, offline data synchronization, and user data collection for consumer market research.

Collaborated with cross-functional teams to deliver high-quality releases throughout the complete software development lifecycle.

Successfully delivered and maintained an application with 5M+ downloads on Google Play, serving a large global user base and ensuring performance, reliability, and scalability.

Technologies: React Native, JavaScript/TypeScript, Redux, REST APIs, Android, iOS, Git.

Keyhook App– 360 Real Estate Platform App

Developed a custom React Native native module to bridge the Insta360 Camera SDK with the React Native application on both Android and iOS.

Integrated native camera functionalities, enabling 360° image capture and processing for immersive 3D room visualization of real estate properties.

Worked across React Native, Android, and iOS native codebases to expose SDK APIs, manage camera lifecycle, and ensure a consistent cross-platform user experience.

Collaborated with the product team to deliver a seamless property viewing experience that enhances virtual home tours.

Technologies: React Native, JavaScript/TypeScript, Redux, REST APIs, Android, iOS, Git.
